North Dragon Sails

North Sails have been developing Championship winning Dragon sails for over 20 years. Below are our latest recommended designs; all our old favorite models are still available. We continue to work with the World's top Dragon sailors developing our product to provide the ultimate range of Dragon sails on the market. Petticrows are able to supply North sails.

Mainsail (A-7+) New for 2010

The A-7+ mainsail is a further development of our famous A-7 mainsail. The sail is now manufactured from a slightly firmer fabric than the A-7 giving a more stable sail and much improved longevity. It's easy to trim characteristics make a fast sail in all conditions and it is used to great effect by club sailors right up to world champions.

- Dimension HTP 270.
- Cross Cut Construction.
- Two Vision Windows.
- Spreader Window.
- Luff and Leech Tell Tails.
- Sail numbers.
- Class Insignia.
- Class Royalty Label.
- Sail Measurement.
- Sail bag.

Genoa (LJ-4) New for 2010

The LJ-4 is our new light Genoa and is a further development from very popular LJ-3. This sail has rocked panels for better load distribution in the head, clew and tack. It is designed for use in wind speeds from 0-12 knots.

- Contenders 3.65oz Contender Polykote.
- Cross Cut Construction.
- Vision Windows.
- Luff Tell Tail.
- Class Royalty Label.
- Sail Measurement.
- Sail bag.

Genoa (MJ-8)

This is our all purpose Genoa new for 2009 and a very popular choice for a single headsail programme. This sail also has rockered panels for better load distribution in the head, clew and tack. It is designed for use in wind speeds of 6-18 knots.

- Contenders 5.46oz Contender Polykote.
- Cross Cut Construction.
- Vision Window.
- Luff Tell Tails.
- Class Royalty Label.
- Sail Measurement.
- Sail bag.

Genoa (MJ-8H)

This Genoa is our medium-heavy headsail, designed to the same flying shape as the MJ-8 the MJ-8H is made from fabric which stretches less and so keeps it's round entry and very straight aft section, ideal wind range is 14-30 knots.

- Contenders 6.5oz Contender Polykote.
- Cross Cut Construction.
- Vision Windows.
- Luff Tell Tails.
- Class Royalty Label.
- Sail Measurement.
- Sail bag.

Spinnaker (CX-8R)

New for 2009 the CX-8R Spinnaker is our all round sail. The cross cut layout with radial clews makes this a simple sail to trim in all conditions.

- Mixture of Contenders 0.75 Dynakote and 0.75 Superkote.
- Cross Cut Layout with Radial Clews.
- Sail Numbers.
- Class Royalty Label.
- Sail Measurement.
- Choice of various colours.

Spinnaker (CX-8)

The CX-8 Spinnaker is designed to the same flying shape as the CX-8, however built in a full cross cut construction, this is our light airs sail for a 0-12 knot wind range.

- Mixture of Contenders 0.75 Dynakote and 0.75 Superkote.
- Cross Cut Layout with Radial Clews.
- Sail Numbers.
- Class Royalty Label.
- Sail Measurement.
- Choice of various colours.
